

How to update Chrome

Normally updates happen in the background when you close and reopen your computer's browser. But if you haven't closed your browser in a while, you might see a pending update:

1. On your computer, open Chrome.
2. At the top right, look at More .
3. If an update is pending, the icon will be colored:
 - **Green:** An update was released less than 2 days ago.
 - **Orange:** An update was released about 4 days ago.
 - **Red:** An update was released at least a week ago.

To manually update to the latest version:

1. Open your Chrome browser

There you will see the current version you are running and that an update is available.

5. After the update is completed, Click "Relaunch"
