

If you are experiencing some problems with videos not displaying properly, please follow these instructions, most of the time the problem is because your browser updates automatically and changes the setting that allow displaying video.

1. Click on the lock icon that is in the URL link (see image below)

2. Click on the drop down list for the "Flash" selection (see image below)

3. Select "Allow" (see image below)

4. Reload your page by clicking on the refresh icon (see image below)
